

7bbl FrankenBrew Kettle/Whirlpool at \$6690

“Frankenstein” -- Cobbled together from parts and pieces of others.

Many brewers start their breweries in much the same way, taking previously in service tanks and parts from other industries, getting up and brewing with significantly reduced start up costs.

The crux challenge of this approach is in piecing together a reliable brew kettle with the required functionality, such as the whirlpool, properly sized steam vent with condensation catch, and larger drains. It's recommended that the one vessel that is best sourced new is the Kettle, and we have a price point on this Kettle that matches up with the "Frankenstein" concept.

Introducing the Forgeworks exclusive “FrankenBrew Kettle” priced at \$6990. This economical Kettle was inspired by well known author and speaker at the Craft Brewers Conference and Great American Beer Festival, Tom Hennessy. Tom coined the term "Franken Brew" as he started and help start many breweries successfully with this concept of piecing a brewery together.

FEATURES

- Forgeworks 3 year warranty
- Made in Colorado, USA with US Domestic 304ss
- Available in 7BBL (320 gallon)
- In-Direct Fire (Natural Gas or Propane)
- 4" Drain Hookup (Ferrule)with offset 4" to 1.5" reducer

- 8" Steam Vent W/Condensation Trough and Drain

- Welded CIP arm with ferrule for removable spray ball
- 8" Exhaust Port
- 18" Manway
- Flat Lid
- Ceramic Insulated Fire Chamber with 1-1/2" Thick Inswool HP8
- Exterior Finish: #4
- Interior Finish: Mill
- Burner Sold Separately; Midco Economite EC200 (\$955)

The cost reductions that deliver this Kettle at a lower pricepoint primarily are due to the Single Wall, and its floor stability coming from an extension of the cylinder rather than legs and feet. Due to the single wall, the outer surface will be hot to the touch during operation, and may add to the brew floor room temperature.

NOTE: If your brewery has/will have an epoxy coated floor, the FrankenBrew Kettle will need to be elevated several inches off the floor to mitigate possible damage to the floor's coating due to heat. The use of intermittent placement of fire bricks is one way to achieve the needed elevation.

For Comparison:

Forgeworks Standard Kettle/Whirlpool priced at \$11,584

FEATURES

- Sized with approximately 40% Freeboard/Headspace
- Dome Top-12gauge 304 Stainless
- Shallow Cone Floor-12 Gauge 304 Stainless
- 18" Round Manway with Hand Forged Brass Handle
- 2" Port for Foam/Boil Over Safety Sensor
- 1.5" Removeable CIP Arm
- 3" Drain (Ferrule Hookup), Removable
- 1.5" Whirlpool Hookup (Ferrule)
- .5" FNPT, 7" Deep Thermowell
- 1.5" Racking Arm Port, 3" Bevel Seat Fitting
